## Construction Update

### October 9, 2024

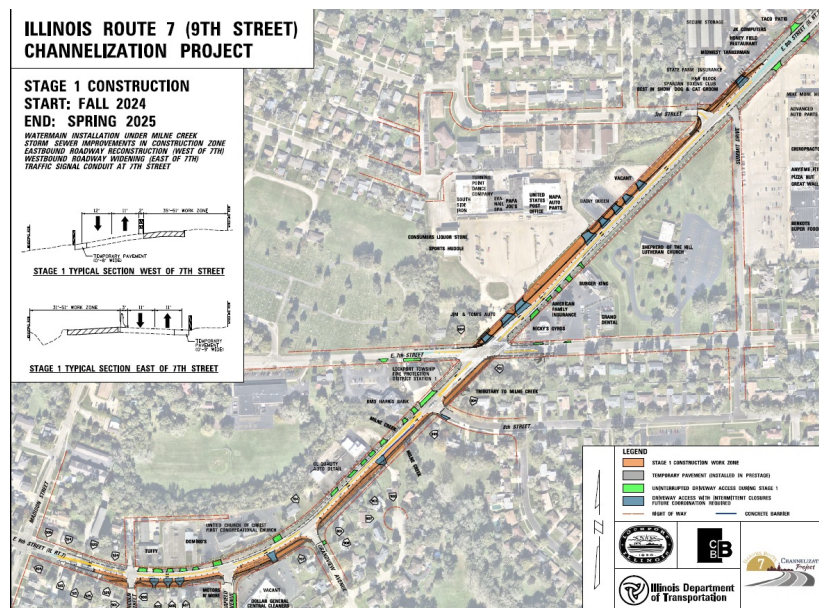

Last week, the contractor completed mainline storm sewer installation throughout the Illinois Route 7 and 7th Street intersection. Following installation, the contractor also installed the 5ft x 5ft box culvert crossing Illinois Route 7. This box culvert will support stormwater drainage routes to efficiently move stormwater and prevent flooding.

This week, the contractor will complete permanent asphalt patching. Upon the completion of the patching work, the pre-stage phase of the project will be complete and traffic patterns will transition to the Stage 1 phase.

**Stage 1 construction will begin on Monday, October 14, 2024. Be alert for a new traffic pattern.**

**Any impacts to traffic or lane closures will be shared daily. Please use caution when traveling through the area.**

**Click on the map below for a full view of Stage 1!**

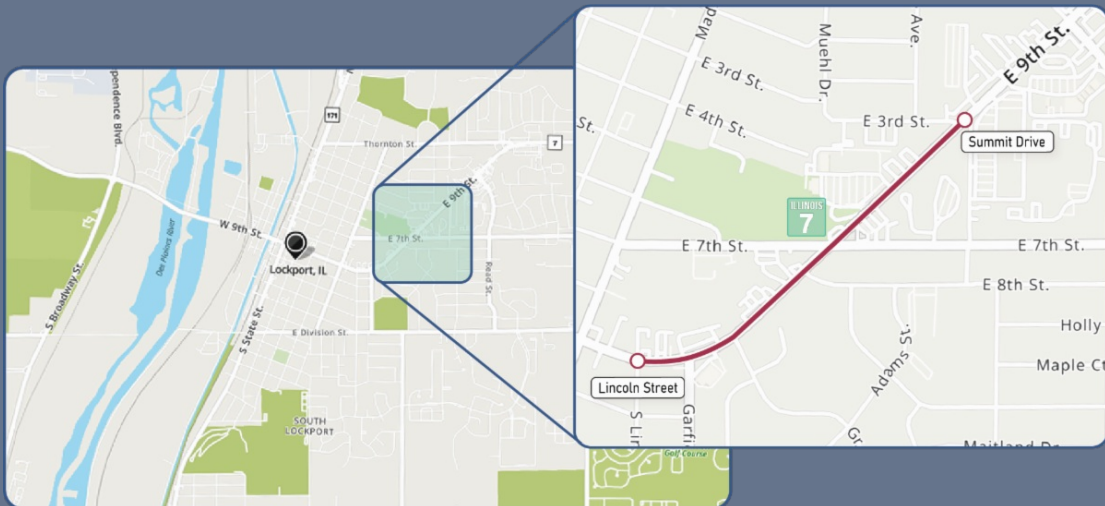

**Box culvert installation**

## Project Map Area

The map below shows where the project is taking place.
